

# Xlerator<sup>®</sup> Hand Dryer

# Thanks to Xlerator®...

- **95% savings** over using paper towels
- Dries hands in **10 - 12 seconds**
- Uses **80% less energy** than conventional hand dryers

**The new standard**  
Xlerator® is the new standard when it comes to hand dryers. Thanks to its innovative technology, Xlerator® achieves unprecedented results: substantially lower costs, less time and less impact on the environment.

... you can save  
€ 60,000 every year.

... the waiting lines in  
your washrooms will  
disappear.

... you will contribute to  
a sustainable society.

**Construction company: Nijhuis**  
Construction company, Nijhuis, has been the home construction specialist in the Netherlands for more than 110 years. With more than 100 construction chains distributed throughout the country, it is a huge challenge to create a clean working environment for its employees. "With the purchase of the Xlerator® hand dryer, it is no longer necessary to equip each construction chain with paper towels and paper waste. In addition, we save over € 60,000 every year. A win-win situation!" says Henk, executor of the construction company.

**Burgers' Zoo**  
Every year, about 1 million people visit Burgers Zoo. Until recently, their washrooms were not equipped well and long waiting lines became normal. This was frustrating for the visitors. "During a test placement of the Xlerator®, we saw that the queues in the washrooms disappeared. Our visitors are able to wash and dry their hands quickly which results in a quick, smooth passage through the washroom area," says an employee of the zoo.

**Office Depot**  
Office Depot, a global retailer of office products and services, states in its environmental vision that it is both possible and lucrative to "increasingly buy green, be green and sell green." In fact, Office Depot is so focused on its vision, the company has developed a full suite of green initiatives to demonstrate their commitment to its vision. One of its initiatives included rolling out a waste-reducing Xlerator® hand dryer in its retail store locations—demonstrating that in time, sustainability is improved.

**Save money**  
When you choose the Xlerator® hand dryer, you achieve significant savings. Xlerator® is more affordable than paper towels, with 95% savings for a year. The short drying time also means that the Xlerator®'s energy consumption is considerably lower than that of conventional hand dryers.

**Save time**  
With its innovative technology, Xlerator® dries hands in 10-12 seconds. Xlerator® also saves a lot of time when it comes to maintenance because washrooms remain clean.

**Save the environment**  
Xlerator® uses 80% less energy than conventional hand dryers and emits less CO2. When compared to paper towels, Xlerator® is by far the most sustainable option.

**Calculate your savings!**  
What will your savings be if you choose Xlerator® hand dryers? For most Xlerator® purchasers, they have saved up to 95% compared to the cost of using paper towels and conventional hand dryers. Contact us to calculate your savings and assist in your buying decision.

# Xlerator®

Xlerator® is available with different covers; white, graphite, stainless steel, chrome and a Special Image cover. With the Special Image Cover, you can give your washroom a unique look. From company logo to club colours and from school emblem to informative message: your own customised design is applied to the cover of the Xlerator®. Using just 500W, the Xlerator® Eco is the most energy-efficient and environmentally friendly hand dryer.
