

Hand Dryer Xlerator Eco

Hand drying

Xlerator Eco

Using just 500W, the Xlerator Eco is the most energy-efficient and environmentally friendly hand dryer, which also generates up to 95% cost savings in comparison with conventional paper hand towels.

Moreover, the low consumption of 500W makes it possible to use multiple hand dryers on one electricity circuit.

The new No Heat technology dries your hands in 15 seconds and the Xlerator Eco is covered by a 7 year factory guarantee as standard.

Product advantages

Features

- Consumes just 500W
- Drying time 15 seconds
- No Heat technology
- Noise suppressing nozzle
- High quality material
- With CE marking

Advantages

- Extra economical, extra environmentally friendly and multiple Xlerators possible on one electricity circuit
- Rapid hand drying
- Environmentally friendly
- Prevents unpleasant noises
- Almost maintenance-free and 7 year factory guarantee
- Complies with the European Directives on safety, health and the environment

Recommended installation heights

Men 114 cm *	Ladies 109 cm *
Handicapped 94 cm *	Children 89 cm *

* Height measured from the floor to the underside of the Xlerator Eco.

Operating instructions

After washing your hands hold them approximately 5 cm under the blower of the Xlerator Eco for 15 seconds. Slowly rub your hands together during this period, ensuring that both sides of your hands have been blown on. When your hands are dry and you remove your hands from under the dryer the Xlerator Eco switches itself off automatically.
