GERMS IN HEALTHCARE FACILITIES

Healthcare facilities can have large amounts of bacteria, even in areas that may seem clean. From waiting rooms and elevators to hospital beds and equipment, germs can live and spread on many touch points. It is important to use a reliable disinfecting product that is certified to be effective against some of the most common contaminants.

Patient Rooms

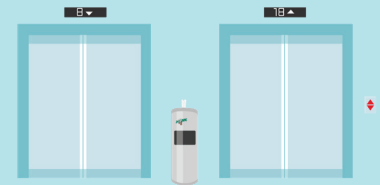

Bacteria and other microorganisms can live for weeks on stainless steel and other types of hospital equipment surfaces. **Spot disinfecting these surfaces with Dreumex Disinfecting Wipes regularly will eliminate the potential of cross-contamination and reduce the spread of harmful bacteria.**

➔ **Dreumex Disinfecting Wipes**

Elevator Buttons

An elevator is touched by dozens of people who come into contact with a variety of bacteria every hour, making it a major point for cross-contamination and spread of disease. **Monk® Disinfectant Wipes kill 99.9% of bacteria and are effective against the bacteria commonly found on elevator buttons.**

➔ **Monk® Disinfectant Wipes**

Waiting Rooms

Patients, their families, and clinic staff can easily transport bacteria into the waiting rooms that are picked up from other areas in the building. **Avoid placing infected patients close to one another and safeguard against infection by frequently wiping tables, pens, and clipboards with Dreumex Surface Disinfecting Wipes.**

➔ **Dreumex Surface Disinfecting Wipes**

Healthcare Equipment

Items such as badges, clipboards, and pens should be cleaned and disinfected regularly to reduce the spread of germs. **By adding Dreumex Disinfecting Wipes to your daily maintenance program, your staff is able to clean, disinfect, and deodorize within a matter of minutes.**

➔ **Dreumex Disinfecting Wipes**

Food Trays & Cafeterias

Food trays and cafeterias are considered to be major hotspots in healthcare facilities as they can be home to a variety of germs. Studies have found that cafeteria trays contain higher levels of germs than bathrooms and gym mats. **Dreumex Food Contact Surface Disinfecting Wipes are safe for food contact surfaces and are ready to use with no need to rinse.**
